

SmartCtrl 2024.1

Three-Phase PFC Boost Converter templates for PSIM

New Three-Phase PFC Boost Converter topologies are available in SmartCtrl 2024.1, while waiting for the next PSIM release (current PSIM version: 2023.1 does not yet include the SmartCtrl 2024.1 Three-Phase PFC Boost Converter templates), it is necessary to include certain templates in the PSIM Folders in order to correctly export the SmartCtrl control design to PSIM.

Please download the zip file available in SmartCtrl website [link: Three-Phase PFC Boost Converter PSIM templates for SmartCtrl 2024.1](#) and replace the entire folder called SmartCtrl that is in X:\Altair\Altair_PSIM_2023.1 with this new one.
